MADE IN ITALY

BY BUYING THIS PRODUCT YOU'RE SHARING AN ETHICAL ENVIRONMENTAL CODE

Dear Customer,
respect for the protection of the environment have led Giorgio Marin SpA to be a **leader in environmentally sustainable production in Italy** and among the first companies **Worldwide** to promote a product with a cycle of production with low environmental impact.

ENERGY EFFICIENCY through the use of modern technology reducing electricity consumption by up to 65%.

PHOTOVOLTAIC large investments in solar power (photovoltaic cells) place us among the top companies in the Forest product sector as producers of solar energy. Annually our Electricity generation is 140% of our total usage (Electricity balance 140%).

BIOMASS all our thermal energy requirement is derived from our own wood waste for a 100% autonomy.

Self sufficiency in Energy production from renewable or recycled sources is a key objective for us and will enable us to reduce our impact on the environment.

The President Giorgio Marin

A CLEAR CONTRIBUTION

PHOTOVOLTAIC PLANT

Total installed capacity: **1,2 MWp**

CO₂ emissions savings equal to
782.000 Kg/year

Autonomy in electricity to **70%**

11.968 solar panels installed

18.000 m² of photovoltaic surface
Equal to the needs of 400 families

BIOMASS THERMAL PLANT

Total installed capacity: **4,5 MW**

CO₂ emissions savings equal to
7.982.000 Kg/year

Autonomy in thermal energy to **100%**

AWARD FOR SUSTAINABLE ECONOMY 2011
for taking concrete actions aimed at sustainable economic development of the territory

**COMPANY WITH QUALITY
MANAGEMENT SYSTEM CERTIFIED BY
UNI EN ISO 9001:2008**
